Mr. Don Harmon Source and Special Nuclear Materials Branch Division of Materials Licensing Atomic Energy Commission Washington, D. C. 20545

Dear Mr. Harmon:

Confirming our telephone conversation of October 13, 1965, please amend our Source Material License SUB-831 as follows:

- 1. Increase maximum quantity of Uranyl Acetate that we may possess at any one time from five (5) pounds to twenty-five (25) pounds
- 2. Add to this license:

Uranium Oxide - solid form (83.2%) Uranium in maximum amounts of twenty-five (25) pounds.

The material will be mixed in concentrations up to 50% by weight into reinforced plastics, elastomeric materials, foams and pyrolized plastics.

The purpose of our tests will be for analytical studies in research and development work. We plan to conduct our tests in hooded areas and to conduct airborne surveys during our initial activity as well as periodic airborne surveys thereafter to assure compliance with limits and standards of Part 20 of the AEC Rules and Regulations, Title 10.

Your efforts in processing this amendment are appreciated.

If you have any questions, please feel free to call me collect

Very truly yours,

H. A. Vripoli
