SUMMARY

Planning to have a controlled release 2.5 Ci Kr 85 from their Trio-Tech Tracer-Ho Unit.

This unit has not been used since 1981.

Preliminary calculation show  $8.39 \times 10^{-5}$  Ci/ml will be released in 24 hr using 500cfm.

This will exceed MPC of  $3 \times 10^{-7}$  Ci/ml.

Will be performing diffusion equations and taking in to account the average release over a yr. This unit has not been used in the last yr but they had other Kr 85 releases.
