February 13, 1973

Mr. John F. O'Leary, Director  
Directorate of Licensing  
U.S. Atomic Energy Commission  
Washington, DC 20545

Dear Mr. O'Leary:

Regulatory

File Cy.

In the Matter of the Applications of ) Docket Nos 50-390  
Tennessee Valley Authority ) 50-391

According to a commitment made by TVA and documented in the Watts Bar Nuclear Plant Staff Safety Evaluation dated August 28, 1972, submitted herewith is Amendment 21 to the TVA application for units 1 and 2 of the Watts Bar Nuclear Plant. The amendment, which consists of miscellaneous page revisions, defines the stress levels which will be used for specifying potential pipe break locations. In addition, the amendment contains some minor editorial corrections.

Please note that this submittal is not a request to amend our construction permits and does not present a significant hazards consideration. Accordingly, a notice of hearing is not required.

Instructions for incorporating the amendment into the PSAR are included with the amendment.

Very truly yours,

*J. E. Gilleland*

Enclosure

INSTRUCTIONS FOR AMENDMENT TWENTY-ONE PAGE CHANGES

The following instructional information and checklist is furnished to help you insert Amendment Twenty-one into Watts Bar Nuclear Plant PSAR.

Since in most cases the original PSAR contains information printed on both sides of a sheet of loose-leaf paper, a new sheet is furnished to replace sheets containing superseded material. As a result, the front or back of a sheet may contain information that is merely reprinted rather than changed.

Only pages which contain amended (i.e., added, deleted, or revised) information are identified with the cipher "WBNP-21" at the top of the page.

Further, where amended information is new or revised, a vertical bar has been inscribed adjacent to the information in the outside margin of the page.

Discard the old sheets and insert the new sheets, as listed below.

Keep these instruction sheets in the front of Volume I to serve as a record of changes.
