South Carolina Electric & Gas Company (SCE&G) submitted a request for an amendment to the Virgil C. Summer Nuclear Station (VCSNS) Technical Specification (TS) in a letter dated November 21, 2006 (Reference 1). The proposed change sought to revise TS 3/4.8.1, A.C. SOURCES - OPERATING, to provide surveillance enhancements to improve operation and testing of the Emergency Diesel Generators (EDG).

While developing a response to Reference 3, SCE&G has determined that additional diesel generator surveillance requirements need to be changed to address the issue in Information Notice IN 2007-09, EQUIPMENT OPERABILITY UNDER DEGRADED VOLTAGE CONDITIONS. Since the additional changes are outside the scope of the surveillance requirements identified in the original submittal, SCE&G hereby withdraws the subject license amendment request.
