SUBJECT

AIR SAMPLING PROGRAM FOR THORIUM AT THE RE-ENTRY

SUMMARY SYSTEMS OPERATIONS SUB-831

Mr McFadden was contacted to discuss his last response (May 2, 1983) to our 2nd Deficiency letter (April 29, 1983).

Mr Mc Fadden clarified his Air sampling program (1) They will do multiple air sampling at the boundary to the restricted and unrestricted area - one sampling point will be in direct line from the operations site to the ventilation air intake (2) They will do multiple air sampling in the restricted area one sampling point will be in direct line with the air intake of the ventilation system (3) They will do personnel air monitoring for the operators (committed in original application and response to first ~~second~~ deficiency letter) He will use standard industrial hygiene techniques (smoke candle etc) to locate best sampling points.

We will write a cover letter confirming the above air sampling program to go with the amendment

ACTION REQUIRED

Draft cover letter
