General Electric Company
Reentry Systems Operations
ATTN: John R. McFadden
3195 Chestnut Street
Philadelphia, PA 19101

Gentlement:

Enclosed is Amendment 10 to License No. SUB-831.

It is our understanding, based on a telephone conversation of May 11, 1983, between John R. McFadden, GE., and Dr. Howe, NRC, that your Track Level Air Monitoring Program will include personnel monitoring for the operators and multiple air samples in both the restricted and unrestricted areas. It is further understood that at least one sample in each area will be taken between the milling machine and the closest air intake point of the ventilation system.

Sincerely,

Donna-Beth Howe, Ph.D.
