Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF OCTOBER 23, 2007, PUBLIC MEETING WITH
DOOSAN HF CONTROLS CORPORATION (HFC) ON A NEW
REVISION OF TOPICAL REPORT (TR) HFC-6000 (TAC NO. MD6990)

On October 23, 2007, a Category 2 public meeting was held between the U.S. Nuclear Regulatory Commission (NRC) staff and representatives of HFC at NRC Headquarters, One White Flint North 11555 Rockville Pike, Rockville, Maryland. The purpose of the meeting was to discuss a new revision of TR HFC-6000. Enclosed is a list of attendees.

The HFC presented their new revision of TR HFC-6000. It was emphasized that in this revision a "simplified architecture" will be used that seeks to reduce the scope of the NRC staff's review. The NRC staff mentioned that a number of documents would need to be made available in order to facilitate the review. Both HFC and the NRC staff hoped that the Request for Additional Information (RAI) questions identified for the prior revision of TR HFC-6000 would help HFC to submit a stronger document this revision. HFC indicated that they did not currently have an industry sponsor.

With regard to schedule, HFC plans to submit TR HFC-6000 in mid-November. The NRC staff will seek to complete the review within two years, but there are staffing and financial challenges. The NRC staff indicated that an acceptance letter should be forthcoming in mid-January. The NRC staff expects that there will be more than one round of RAI questions. The HFC pledged to provide a response to RAI questions within sixty days. Both HFC and the NRC staff agreed on the desirability of quarterly progress meetings.

No handouts were provided at the meeting. Members of the public were not in attendance. Public Meeting Feedback forms were not received.
