Subject: Amendment to CBP005a.

Dear Mr. Baker,

International Isotopes Inc. seeks to amend specific Import/Export License CBP005a in accordance with the enclosed NRC Form 7 and the information contained within this letter. International Isotopes Inc. currently has several requests to provide Co-60 sources in various countries. These sources are typically associated with Co-60 teletherapy source exchange which results in the subsequent import of the old Co-60 source. In addition, International Isotopes Inc. has been contacted by the Department of Energy's Off Site Source Recovery Program as well as the International Atomic Energy Commission to support global threat reduction initiatives through the importation of Co-60 and Cs-137 sources from various countries.

International Isotopes Inc. requests that, to the extent possible, Import/Export License CBP005a be revised to support the above mentioned activities. A check of \$700.00 is enclosed to cover the amendment fee. Country and facility information (where available) is provided in the tables below:

As mentioned above the US Department of Energy and the International Atomic Energy Agency have identified radioactive sources to be imported into the United States in support of global threat reduction activities. It is anticipated that additional countries will

be added to this list as threats are identified. The table below identifies two countries where source recovery options are pending.

DOE/IAEA Sponsored Imports	
Country	Isotope / Estimated Activity
Uruguay	Co-60 / 15,000 Ci
Nicaragua	Co-60 / 3,000 Ci
