

LICENSEE

DOCKET NO. 040-07344

D-179

LOCKHEED MARTIN CORPORATION  
P. O. BOX 8555  
PHILADELPHIA, PA. 19101

PRIORITY : 3  
DATE OF CURRENT INSPECTION: 01/1998

PROGRAM CODES: 11300

Inspection Manual Chapter 2800 requires that the inspection interval shall be extended under certain circumstances and that it may be reduced under other circumstances. This form is to be filled out by the inspector and signed by the supervisor at the end of every inspection.

The criteria that must be considered to extend the inspection interval are (1) the current and preceding inspections meet criteria for documentation on an RC Form 591 and no more than two Severity Level IV violations per inspection occur; and (2) the licensee has not had a significant program change since the preceding inspection.

Some of the criteria that may be considered to reduce the inspection interval are (1) a Severity Level I, II, or III violation on the most recent inspection; (2) issuance of an Order or escalated enforcement on the most recent inspection; or (3) if a "management paragraph" appears, in the cover letter transmitting the NOV on the most recent inspection; (4) an event requiring a reactive inspection; or (5) repetitive violations.

Based on evaluation of the licensee's performance (Inspection No. 001 and Inspection No. 93 (previous inspection)) against the above criteria, the next inspection should be:

- No change in inspection frequency, next inspection should be on 3/2001
- Increase inspection interval, next inspection should be on \_\_\_\_\_  
 Priority 1 normally 1, increase up to 2 years  
 Priority 2 normally 2, increase up to 3 years  
 Priority 3 normally 3, increase up to 5 years  
 Priority 5 normally 5, increase up to 7 years
- Decrease inspection interval, next inspection should be on \_\_\_\_\_  
 (Inspection interval may be reduced by any length)
