MEMORANDUM TO: Jared S. Wermiel, Deputy Director
Division of Safety Systems
Office of Nuclear Reactor Regulation

FROM: David P. Beaulieu, Project Manager */RA/*
Generic Communications and Power Uprate Branch
Division of Policy and Rulemaking
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF THE OCTOBER 12, 2007, CATEGORY 2 PUBLIC MEETING
WITH THE NUCLEAR ENERGY INSTITUTE TO DISCUSS DRAFT NRC
GENERIC LETTER 2007-XX, "MANAGING GAS INTRUSION IN EMERGENCY
CORE COOLING, DECAY HEAT REMOVAL, AND CONTAINMENT SPRAY
SYSTEMS"

On October 12, 2007, the U. S. Nuclear Regulatory Commission (NRC) staff met with representatives of the Nuclear Energy Institute (NEI) in a public meeting at the NEI offices in Washington, DC. Enclosure 1 provides a list of those in attendance. The purpose of the meeting was for the industry to present information and to solicit NRC staff feedback regarding their plans to develop a common approach and template that individual licensees can use in their response to the subject draft generic letter.

Enclosure 2 is the NEI slide presentation that outlines the specific information discussed. In particular, NEI suggested that more time would be needed to scope, fund, and complete the activities needed to develop a common approach and for licensees to then prepare their individual response. The NRC staff agreed to consider changing the draft generic letter to allow 9 months for the generic letter response instead of 6 months. The NRC staff also agreed to meet with NEI after the generic letter is issued to discuss the development of a guidance document on gas accumulation and a generic letter response template.

In addition, one NEI representative suggested that the draft generic letter be revised to use the term "gas accumulation" instead of "gas intrusion" because it more clearly describes the gas problem. The NRC staff agreed to change wording as suggested.

No members of the public were present or participated via teleconference.
