Frank,

I am concerned about this request. What are your thoughts. I would think we would want to clear these discussions with both Tim and OGC.

Frank,

Patti needs some background information on Part 63 final rule for a meeting she is having with EPA. Please provide a few written notes on the rule. The talking points should give background on what the NRC is doing in this particular area and what interfaces we either have with EPA or need to establish. The talking points should also describe any timing information we have.

Please provide the information to Mark by June 13.

Merri
