OK,

Frank, Tim McCartin and I have talked about this. We can go for the end of June date, with this caveat. There is a slight possibility that OMB or the Department of Justice could still force a change to the EPA standard. If that happens, then we would need to seek an extension and we would assume that the SECY clock would be reset because it would be the result of action outside our (or EPA's) control.

Thanks,

mark D.

Hi Folks,

Please see attached from Patty Tressler, OEDO, re date for WITS 200500313, "Final Rulemaking to Amend 10 CFR Part 63, 'Implementation of a Dose Standard After 10,000 Years'." A date is needed for this WITS item and we told them we'd revisit the date issue at the end of June. However, SECY is asking if we can tell them something now. Please let me know.

Barbara
