This notice is to confirm that James M. Galvin, D.Sc., Professor and Director – Medical Physics (Department of Radiation Oncology), is currently named as an Authorized Medical Physicist (AMP) for 35.400 ophthalmic uses of strontium-90 and 35.600 high dose-rate remote afterloader uses under Type A Broad Scope Medical License 37-00148-06.

Dr. Galvin's authorization dates to the implementation of 10 CFR Part 35 revisions on October 24, 2002. Prior to that time Dr. Galvin served as a Radiation Therapy Physicist for the uses described above, since beginning his tenure as Director of Medical Physics on February 1, 1997.

Jefferson HealthCARE physicians

Dr. Galvin is also currently named as AMP for gamma stereotactic radiosurgery (35.600) on NRC License No. 37-00148-08.
