

831 Power Building
TENNESSEE VALLEY AUTHORITY
CHATTANOOGA, TENNESSEE 37401

April 16, 1975

Mr. Norman C. Moseley, Director
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission
Region II - Suite 818
230 Peachtree Street, NW.
Atlanta, Georgia 30303

Dear Mr. Moseley:

OFFICE OF INSPECTION AND ENFORCEMENT BULLETIN 75-03 - IE:II:NCM
50-259, -260, -296, -327, -328, -390, -391, -438, -439 - BROWNS
FERRY UNITS 1 AND 2

In response to your March 14, 1975, letter, which transmitted
IE Bulletin 75-03 our preliminary investigation indicates that
some of the described ASCO valves may have been used in safety-
related systems. A report on the extent of such usage and any
proposed corrective action on the ASCO valves will be submitted
for all TVA nuclear plants by May 16, 1975. Browns Ferry units
1 and 2 are out of service because of the recent cable fire
and will not be in service for some time.

Very truly yours,

J. E. Gilleland
Assistant Manager of Power

AOV

Letter to N. C. Moseley from Tennessee Valley Authority dated April 16, 1975.
