

Reference List of 4S (Super Safe, Small and Simple LMR)

- [1] **“Status of Small Reactor Designs without On-Site Refueling 2007”**, IAEA-TECDOC-1536, International Atomic Energy Agency (IAEA), January, 2007
- [2] **“Heat Removal Characteristics of the 10MWe Sodium Cooled Small Fast Reactor (4S)”**, Nishi Y., et al., ICONE15-10603, 15th International Conference on Nuclear Engineering, Nagoya, Japan, April 22-26, 2007
- [3] **“Analytical Evaluation of Reactor Coolability for Sodium Cooled Small Fast Reactor (4S) -Investigation of RVACS Performance under Loss of Stacks Condition-”**, Nishimura S., et al., ICONE15-10397, 15th International Conference on Nuclear Engineering, Nagoya, Japan, April 22-26, 2007
- [4] **“Sensitivity and Uncertainty Analysis of ARGO-3 Code on the ULOF Event of the 4S Reactor”**, Horie H., et al., ICAPP’06-6255, Proceedings of 2006 International Congress on Advances in Nuclear Power Plants, Reno, NV USA, June 4-8, 2006
- [5] **“Safety Performance of the 4S Reactor on the ATWS Events - Statistical Estimation of Uncertainty -”**, Horie H., et al., the 2nd COE-INES International Symposium on Innovative Nuclear Energy Systems, INES-2, Yokohama, Japan, November 26-30, 2006
- [6] **“Development of an Advanced Controlling System for Non-refueling Reactors”**, Kinoshita I., et al., ICAPP’05-5115, Proceedings of 2005 International Congress on Advances in Nuclear Power Plants, Seoul, Korea, May 15-19, 2005
- [7] **“No refueling Core Design for the 4S”**, Tsuboi Y., et al., ANS Annual Meeting, Washington, US, November, 2005
- [8] **“Development of an Advanced Fuel Subassembly for Non-Refueling Core”**, Koga T., et al., ANS Annual Meeting, Washington, US, November, 2005
- [9] **“Development of Neutronics Analysis Technique for Non-Refueling Core (Part1 Critical Experiment)”**, Okajima S., et al., ANS Annual Meeting, Washington, US, November, 2005
- [10] **“Development of Neutronics Analysis Technique for Non-Refueling Core (Part2 Method)”**, Takeda T., et al., ANS Annual Meeting, Washington, US, November, 2005

- [11] **“Development of Neutronics Analysis Technique for Non-Refueling Core (Part3 Burn-up Calculation)”**, Nauchi Y., et al., ANS Annual Meeting, Washington, US, November, 2005
- [12] **“Computational Analysis of the Thermal-Hydraulic Characteristics of the Encapsulated Nuclear Heat Source”**, Nishi Y., et al., Nuclear Technology, Vol.152 (2005)
- [13] **“A New Concept of the 4S Reactor and Thermal Hydraulic Characteristics”**, Nishi Y., et al., ICONE12-49257, 12th International Conference on Nuclear Engineering, Arlington, USA, April 25-29, 2004
- [14] **“Development of 160m³/min Large Capacity Sodium-Immersed Self-Cooled Electromagnetic Pump”**, Ota H., et al., Journal of NUCLEAR SCIENCE and TECHNOLOGY, Vol.41, No.4, p.511-523, April, 2004
- [15] **“Passive Safety Characteristics of 4S Reactor”**, Nishi Y., et al., Fourth Japan-Korea Symposium on Nuclear Thermal Hydraulics and Safety, NTHAS4, Sapporo, Japan, November 28-December 1, 2004
- [16] **“An Optimization Study on the Reflector-Controlled Long Life LMR Core Aiming at a Negative Void Reactivity”**, Yokoyama T., et al., ICONE11-36284, 11th International Conference on Nuclear Engineering, Tokyo, Japan, April 20-23, 2003
- [17] **“Experimental Study on Reactivity Worth of Burnable Poison in Ultra-Long Life, Small LMR”**, Kikuchi S., et al., ICONE10-22231, 10th International Conference on Nuclear Engineering, Arlington, USA, April, 2002
- [18] **“Current Design Status of Sodium Cooled Super-Safe, Small and Simple Reactor”**, Ueda N., et al., ICONE10-22353, 10th International Conference on Nuclear Engineering, Arlington, USA, April, 2002
- [19] **“Passive Safety Features in Sodium Cooled Super-Safe, Small and Simple Reactor”**, Ueda N., et al., ICONE10-22354, 10th International Conference on Nuclear Engineering, Arlington, USA, April, 2002
- [20] **“Study on Ultra-Long Life, Small U-Zr metallic Fueled Core with Burnable Poison”**, Tsuji K., et al., ICONE10-22355, 10th International Conference on Nuclear Engineering, Arlington, USA, April, 2002

- [21] **“Development of an Innovative Reflector Drive Mechanism using Magnetic Repulsion Force for 4S Reactor”**, Tsuji K., et al., Ninth Int. Conf. On Nuclear Engineering (ICONE-9), Nice Acropolis, France, April, 2001
- [22] **“Study on Ultra-Long Life, Small LMR with Burnable Poison”**, Yokoyama T., et al., Ninth mt. Conf. On Nuclear Engineering (ICONE-9), Nice Acropolis, France, April, 2001
- [23] **“Physics Benchmark Experiments and Analysis for Reflector-Control-Type Small Fast Reactors at Toshiba Nuclear Critical Assembly”**, Kawashima M., et al., Nuclear Data for Science and Technology, ND2001, Tukuba, Japan, October, 2001
- [24] **“Small LMR Electric Power for Small Grid”**, Minato A., Handa N., 3rd International Conference on Nuclear Option in Countries with Small and Medium Grids, Croatia Nuclear Society, June, 2000
- [25] **“Development of a Reflector Drive Mechanism Using Magnetic Repulsion Force for 4S Reactor”**, Matsumiya H., et al., ANS Winter Meeting, Washington, D.C., November 12-16, 2000
- [26] **“Toshiba Nuclear Critical Assembly Physics Benchmark Experiments for Reflector-Control-Type Small Fast Reactors”**, Watanabe M., et al., ANS Winter Meeting, Washington, D.C., November 12-16, 2000
- [27] **“Super-Safe, Small, and Simple Reactor concept toward the 21st Century”**, Nishiguchi Y., et. al., Workshop on Proliferation-Resistant Nuclear Power Systems at LLNL, by Center for Global Security Research, June, 1999
- [28] **“A Challenge to Global Environmental Issues by Small Reactor -Nuclear Desalination and Prevention of Desertification-”**, Minato A., Sugiyama T., 3rd International Symposium on Global Environment and Nuclear Energy Systems, Tokyo Institute of Technology, December, 1999
- [29] **“Compact Long Fuel-life Reactors for Developing Countries”**, Greenspan E., Aoki K., Elias E., Kastenber W. E., Stone N., Brown N. W., ICENES'98 - 9th Int. Conf. on Emerging Nuclear Energy Systems, 1998
- [30] **“Energy Source for Human Demand”**, Hattori, S., Minato, A., ANS Annual Meeting, Orlando, US, June, 1997

- [31] **“Energy Source for the Human Demand”**, Hattori, S., NATO Workshop, Advanced Nuclear Systems-Consuming Excess Plutonium, Moscow, Russia, Oct., 1996
- [32] **“Realization of Safety Culture into a Reactor Plant-4S (Super Safe, Small and Simple) LMR”**, Hattori, S., Ikemoto, I., Minato, A., Int. Topical Meeting on Safety Culture in Nuclear Installations, Vienna, April, 1995
- [33] **“Sodium-immersed Self-cooled Electromagnetic Pump Design and Development of a Large-scale Coil for High Temperature”**, Oto A., et al., Nuclear Technology, Vol.110, May, 1995
- [34] **“Long Term Pu Storage and MA Burning in a Small Fast Reactor”**, Aoki, K., Hattori, S., Global’95, France, 1995
- [35] **“Human Welfare by Nuclear Desalination Using Super-Safe, Small and Simple Reactors (4S)”**, Hattori, S., Minato, A., Desalination, 99 (1994) 345-365
- [36] **“A Large Modular LMR Power Station which Meets Current Requirements”**, Hattori, S., Minato, A., 3rd ASME-JSME Int. Conf. On Nuclear Engineering-1994 (ICONIE-3), Tokyo, Japan, 1994
- [37] **“Reactivity Evaluation of Fast Reactor Core Controlled by Azimuth Separated Reflector at Withstand Accident”**, Yokoyama, T., Ueda, N., 3rd ASME-JSME Int. Conf. On Nuclear Engineering-1994 (ICONE-3), Tokyo, Japan, Oct., 1994
- [38] **“Design of Small and Simple LMR Cores for Power Generation in Remote Communities”**, Aoki, K., Kasai, S., Hattori, S., 3rd ASME-JSME Int. Conf. On Nuclear Engineering-1994 (ICONE-3), Tokyo, Japan, Oct., 1994
- [39] **“Development of an advanced, self-cooled electromagnetic pump for main heat transfer system application of the sodium-cooled fast breeder reactors”**, Kubota J., et al., Proceedings of the International ISEM Symposium on Simulation and Design of Applied Electromagnetic Systems, Sapporo, Japan, 26-30, January., 1993
- [40] **“Current Status of 4S Plant Design”**, Hattori, S., Minato, A., 2nd ASME-JSME Int. Conf. On Nuclear Engineering-1993 (ICONE-2), California, March 21-24, 1993
- [41] **“Passive Safety Features in 4S Plant”**, Hattori, S., Minato, A., 2nd ASME-JSME Int. Conf. On Nuclear Engineering-1993 (ICONE-2), California, March 21-24, 1993

- [42] **“Meet Global Needs by 4S Plant”**, Hattori, S., Minato, A., 2nd ASME-JSME Int. Conf. On Nuclear Engineering-1993 (ICONE-2), California, March 21-24, 1993
- [43] **“Study on the Application of Nuclear Energy to Human Welfare and Safety”**, An, S., Minato, A., 4th Annual Scientific and Technical Conference of Nuclear Society, NE’93, Nizhni Novgorod, Russia, June 28-July 2, 1993
- [44] **“A Feasibility Study on TRU Burning in a Small Fast Reactor with Negative Sodium Void Worth”**, Aoki, K., Kawashima, M., Minato, A., ICENES’93, 1993
- [45] **“The Super Safe, Small and Simple Reactor (4S-50)”**, Hattori, S., Minato, A., Int., Conf. On Design and Safety of Advanced Nuclear Power Plants (ANP ’92), Oct., Tokyo, 1992
- [46] **“Present Design Features of the Super Safe Small and Simple Reactor”**, Hattori, S., Minato, A., Handa, N., Int. Specialist Meeting on Potential of Small Nuclear Reactors for Future Clean and Safe Energy Sources, Oct., Tokyo Institute of Technology, 1991
- [47] **“Technical and Economical Potential of Small Reactors”**, Hattori, S., Int. Specialist Meeting on Potential of Small Nuclear Reactors for Future Clean and Safe Energy Sources, Oct., Tokyo Institute of Technology, 1991
- [48] **“Super-Safe, Small and Simple Reactors for the Global Energy Demand”**, Ueda, N., Minato, A., Handa, N., Hattori, S., Proc. of Int. Conf. on Fast Reactors and Related Fuel Cycles, Kyoto, Oct., 1991
- [49] **“Application of Super Safe Small and Simple Reactor for Nuclear Desalination in the Desertification Area”**, Hattori, S., Minato, A., Tech. Responses to Global Environmental Challenges, Kyoto, Nov., 1991
- [50] **“Design and Fabrication of Few Tube Test Model (Double Wall Tube Steam Generator)”**, Nakagawa H., et al., Steam Generator and Heat Exchanger Conference, Toronto, Canada, April 30-May 2, 1990
- [51] **“Use of Super-Safe, Small and Simple LMRs to Create Green Belts in Desertification Area”**, Hattori, S., Handa, N., Trans. ANS., Vol.60 (1989)
- [52] **“Feasibility study of primary sodium-heated steam generator”**, Nakagawa H., et al., Proc of International Conference on Fast Breeder Systems: Experience Gained and Path to Economic Power Generation, Wash, USA, p.11.7.1-11.7.13, Vol.2, 1987
