

SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION

1. LICENSEE/LOCATION INSPECTED: Hockaden and Associates 883 N. Cassady Avenue Columbus, Ohio 43219		2. NRC/REGIONAL OFFICE U.S. Nuclear Regulatory Commission Region III 2443 Warrenville Road Suite 210 Lisle, Illinois 60532-4351	
REPORT	07-01		
3. DOCKET NUMBER(S) 030-37486	4. LICENSEE NUMBER(S) 34-32658-01	5. DATE(S) OF INSPECTION 10/25/2007	

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- X 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied.

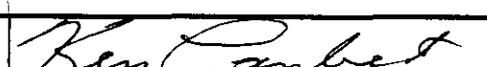

..... Non-Cited Violation(s) was/were discussed involving the following requirement(s) and Corrective Action(s):

4 During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.

(Violations and Corrective Actions)

Licensee's Statement of Corrective Actions for Item 4, above.

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

Main Office Inspection Next Inspection Date: 10/2012

Field Office _____

Temporary Job Site _____

PROGRAM SCOPE

This was the initial inspection of this licensee. The licensee currently possesses a licensee from the State of Ohio for possession and use of portable moisture density gauges. The NRC licensee was issued to allow the licensee to use licensed material at temporary job sites. The licensee is a small engineering firm with approximately 25 employees and located in Columbus, Ohio. The licensee's primary business is in housing development and design, including infrastructure. The licensee began material testing in 2003. The licensee performs density and compaction testing of surfaces using 2 Troxler 3400 series and one Pacific Nuclear portable gauges. The licensee does not perform any service or maintenance activities on the gauges. All gauge users (3) have attended a training class provided by the gauge manufacturer or individuals authorized to conduct such training.

Performance Observations

At the time of the inspection, the licensee was using the gauge at a temporary job site at Fort Knox, Tennessee, an area of NRC jurisdiction. The licensee personnel demonstrated for the inspector the procedure used to secure the gauges in the field when not in use and under the supervision of an authorized user. The licensee personnel provide shipping papers used during the transport of the gauges. The licensee discussed the process for leak testing and conducting inventories of the devices. The licensee provided current leak test records for each of the gauges possessed by the licensee. The last leak test, was performed on 10/23/07, no results have been received for this leak test. Leak tests were performed at the required frequencies. Reviewed personnel exposure results for 2007, with the maximum year to date dose recieved by an individual of 22 mrem.

No violations of NRC requirements were identified during this inspection.
