COMMISSION VOTING RECORD

DECISION ITEM: SECY-07-0146

TITLE: SECY-07-0146 – REGULATORY OPTIONS FOR LICENSING
NEW URANIUM CONVERSION AND DEPLETED URANIUM
DECONVERSION FACILITIES

The Commission (with all Commissioners agreeing) approved the subject paper as recorded in the Staff Requirements Memorandum (SRM) of October 10, 2007.

This Record contains a summary of voting on this matter together with the individual vote sheets, views and comments of the Commission.

A handwritten signature in black ink, appearing to read "Annette L. Vietti-Cook", written over a horizontal line.

Annette L. Vietti-Cook
Secretary of the Commission

**Chairman Klein's Comments to SECY-07-0146
Regulatory Options for Licensing
New Uranium Conversion and
Depleted Uranium Deconversion Facilities**

I approve the staff's recommendations. I also support Commissioner Jaczko's comment on inviting comment regarding appropriate threshold limits but would like to broaden this to having staff consider conducting a workshop with stakeholders prior to providing a proposed rule for comment.

**Commissioner Jaczko's Comments to SECY-07-0146
Regulatory Options for Licensing New Uranium Conversion
and Depleted Uranium Deconversion Facilities**

I approve of the staff's recommended option to establish regulatory requirements similar to those in Subpart H of Part 70 for licensing existing and proposed uranium conversion and deconversion facilities. I also approve of the staff recommendation to keep smaller facilities, which are not in the national interest to maintaining a secure supply of nuclear fuel to critical energy infrastructure facilities, under Agreement State jurisdiction.

The staff's recommended option 3 suggest that thresholds be set for source material at 10,000 kg of uranium hexafluoride and 1,000 pounds of hydrogen fluoride for imposition of requirements on existing or proposed conversion/deconversion facilities. In developing the proposed rule the staff should invite comment on the appropriateness of the threshold limits for determining whether a facility will be regulated by the NRC.

This paper came to the Commission marked official use only (OUO) – security-related information (SRI). I believe the staff was over cautious in marking this document OUO-SRI. Thus, I believe this paper should be released to the public since it does not contain security related information.

Gregory B. Jaczko
