As an employee of Entergy Nuclear Northeast and a Hudson Valley resident, I implore you to approve the relicensing of the Indian Point Energy Center in Buchanan, NY.

While Indian Point is located in this region, its two nuclear units have never contributed carbon emission (and produced 2000 megawatts of electricity) to this problem given the benefits of nuclear technology in combating global warming. Even Greenpeace co-founder and nuclear power advocate Dr. Patrick Moore has noted as much in many speeches he has given throughout this area.

For the good of the region, and in light of the need for more environmentally friendly sources of electricity, I ask you to support the relicensing of Indian Point.

Regards,

Daria Zaluckyj
