CHAIRMAN - Re: your IP2 and IP3 UFSAR request

From: <RoycePenstinger@aol.com>
To: <PDR@nrc.gov>, <geri_shapiro@clinton.senate.gov>, <chairman@nrc.gov>, <ptk@nrc.gov>, <fxc@nrc.gov>
Date: 10/23/2007 2:22:36 PM
Subject: Re: your IP2 and IP3 UFSAR request

Dear Karen:

Herein is the difficulty...I formally requested all these documents through and official FOIA request. What I got, was a list of documents, and a letter telling me that the ones without a ML number (historical documents pre-1999 were available through the Public Document Room, with a suggestion that I reach out to the PDR staff, which I have done. This, even though Bo Phem stated at the public meeting that ALL Indian Point documents were on ADAMS.

We as and organization qualify for a waiver of fees, but instead, the NRC is attempting to play games, and place harsh hardships on stakeholder citizens with the fees you discuss in your letter. 10 cents and 30 cents a page is unduly unfair and restrictive, especially since FUSE USA and myself as the Vice President have even been willing to have the documents uploaded to ADAMS so that ALL CITIZENS could have access to them. Again, Bo Phem even represented to the public that all these documents were ALREADY ON ADAMS, which they are not. (noticeably absent are the fire safety standards).

Your suggestion that it is an easy task for us to simply come to Rockland Maryland is not acceptable, especially since the documents we are asking for should be, but are not in our local document room here in the Peekskill area.

In short, our organization is being put between the pot and the kettle...the NRC has admitted the documents exist, has identified them by number, but not provided a copy of them despite numerous formal FOIA request by myself, Susan Shapiro, and FUSE USA as and organization. These crucial documents are not on ADAMS, which we have verified from our extensive search. In fact, we formally requested that the NRC put these documents on ADAMS, so that the stakeholders could have access to them.

It sounds here, as if the NRC is trying through various assorted means to keep citizens from having access to documents necessary to adequately evaluate Entergy's Indian Point License Renewal Application. We therefore formally request that the PDR as is allowed by FOIA either put all of the following documents up on ADAMS, or make a hard copy available to FUSE USA via first class mail. Sure if you check with the FOIA office, we have filed more than adequate information to qualify for a fee waiver for these documents.

In a message dated 10/23/2007 1:59:11 P.M. Eastern Daylight Time, PDR@nrc.gov writes:

Sherwood,

I've reviewed what we have covered to date, and the information and FSAR section previously sent to you. The reports listing of FSAR submittals have also been sent to you for your review.

After consultation with my colleagues on the PDR reference staff, I believe we have sent you what is feasible with in the context of the PDR. Please note the PDR librarians are reference librarians and we are not staffed for intensive research projects such as yours.

The information regarding the PDR which is posted on the NRC website states:

"REFERENCE ASSISTANCE: The PDR files are open to the public, and the PDR reference librarians assist on-site researchers in their use. The reference staff also responds to requests received by telephone, e-mail, fax and postal mail. Although staffing constraints prohibit PDR staff from performing extensive research on behalf of users, the staff will assist the public in doing their own research."

The amount of and specificity of information, when combined with the date range (legacy library) would indicate research work, the amount and time necessary to locate the documentation required as beyond the intent of the PDR reference librarians.

You, or someone you know, can visit the Public Document Room at NRC Headquarters in Rockville, MD and do the research in person. Copies can be made of the fiche to paper for \$0.10 per page in the reading room, or (once you locate the specific pages) can be sent to our copy service contractor for \$0.30 per page, plus postage. Information on our copy contractor will also be found at the NRC website:
<http://www.nrc.gov/reading-rm/pdr/fee-schedule.html> .

Regards,
 Karen

Hi Karen:

Any help you can provide will be greatly appreciated. Unfortunately, trying to pick say two or three of these UFSAR related documents as more important than the rest is all but impossible to do, as they are a part of the CBT (Current Licensing Basis) that Entergy's License Renewal Application is based upon. Reactor Coolant leakage, reactor coolant internals, and the parts of the various UFSAR's that deal with their (aging) management are absolutely

crucial documents in adequately reviewing Entergy's Indian Point Application, and right now our deadline is fast approaching. (November 30th, 2007)

So, based on that, I first would say that the best approach is to start at the top of the list, and just begin working through them one at a time.

Secondly, you mention weeks, which I understand. Can you give me a clearer image of the time lines we are talking about here? Weeks can be anything from two weeks forward...life is never simple, is it? Further, once the specific sections have been identified, will they have to be reviewed for National Security reasons? Just trying to get a handle on what the time constraints actually are. Lastly, it would be greatly appreciated if you could send stuff along as it becomes available, so that we as an organization can mitigate and management these time constraints in a responsible manner.

Again, you have been, and are being such a big help in our attempts to find, locate and view these documents, and just wanted to thank you again for your efforts.

Sherwood Martinelli

In a message dated 10/23/2007 8:45:10 A.M. Eastern Daylight Time, PDR@nrc.gov writes:

Good Morning,

I'm beginning to look through the attached listing now, and this could take me several days or weeks - I will probably not make your deadline.

If you pick out a few documents from the attached, then I can look through them quicker, and locate the section titled "Monitoring Reactor Coolant Leakage".

Sincerely,

Karen

Hello,

I could not locate any electronic documents for IP2 or IP3 UFSAR, but attached are the bibliographic files from our Legacy Library. The documents are only on microfiche. I will look at them next week, to verify which pages deal with "Monitoring Reactor Coolant Leakage", but I just wanted to show you before the weekend what I had found.

Thanks.

Sincerely,
Karen

Hi Karen:

Trust you had a nice weekend? Last we communicated, you were off for the weekend, and I think had the following Monday off.

You wrote in your note today:

"Did you still need the IP3 "Monitoring Reactor Coolant Leakage" section, and any other years for this section?"

Yes! Pretty please even. We are actually as I write this working on the leak issues. A hard copy of it would really be appreciated.

Another manner...I received a very long list that identifies a lot of

documents that are not on ADAMS, but available through the Public Document Room, in response to a FOIA I had filed...do I need to file a new FOIA with a fee waiver request through the Public Document Room, or can I work with you to get these documents? I am guessing quite a few would need reviewed, and if you like, I can scan in the list and send it as an attached file to an email.
