Subject: AP1000 COL Standard Technical Report Submittal of APP-GW-GLR-134 (TR 134), Revision 0

In support of Combined License application pre-application activities, Westinghouse is submitting AP1000 Standard Combined License Technical Report Number 134, "AP1000 DCD Impacts to Support COLA Standardization." The purpose of this Technical Report 134 is to address impacts to the AP1000 Design Control Document (DCD), Revision 16, such as DCD discrepancies, RAI's containing DCD changes, and information included in recently submitted Technical Reports that impact the DCD. This report identifies the impacts and identifies the source document (Technical Report or RAI response) that provides the technical and regulatory bases for the change or addition. Note that a number of the impacts are minor corrections (e.g., editorial changes) that do not require technical or regulatory justification.

This report is submitted as part of the NuStart Bellefonte COL Project. The information in this report is generic and is expected to apply to all COL applications referencing the AP1000 Design Certification. The document is structured in two parts. Attachment A provides the tabular information listing the impacts, a unique numerical identifier (NRC nm), a brief description, the impacted DCD section, the DCD impact type (Tier 1, Tier 2, or Tier 2*), the change criteria evaluation result (*i.e.*, NRC prior approval required or NRC prior approval not required), and any appropriate Technical Report and RAI response references. Attachment B contains the markup DCD pages that provide the changes and additions identified in Attachment A. The unique identifier (NRC nm) is indicated as a left-hand margin annotation to link each markup to the appropriate DCD impact in Attachment A. Please note that the DCD markups in this Technical Report are provided using the redline/strikeout format. As a result, the page numbers on the redline/strikeout pages will not correspond to those in DCD Revision 16.

These redline/strikeout pages are supplemental to the DCD Revision 16 change pages, and together provide the NRC staff with the DCD information for their review to support the AP1000 design certification amendment application. They also support the various COL application FSAR sections that "Incorporate by Reference" the AP1000 DCD Revision 16 as amended by APP-GW-GLR-134.

This Technical Report will be revised as necessary to address any future impacts to Revision 16 of the DCD. Westinghouse and the AP1000 Design Centered Work Group will continue working closely with the NRC Staff to coordinate updates.

Pursuant to 10 CFR 50.30(b), APP-GW-GLR-134, Revision 0, "AP 1000 DCD Impacts to Support COLA Standardization," Technical Report Number 134, is submitted as Enclosure 1 under the attached Oath of Affirmation.

Questions or requests for additional information related to content and preparation of this report should be directed to Westinghouse. Please send copies of such questions or requests to the prospective applicants for combined licenses referencing the AP1000 Design Certification. A representative for each applicant is included on the cc: list of this letter.

Westinghouse requests the NRC to provide a schedule for review of the technical report within two weeks of its submittal.

Very truly yours,

A. Sterdis, Manager
Licensing and Customer Interface
Regulatory Affairs and Standardization
