Confirming discussions with your staff representative, Mr. Wesley Byrd, the site visits on March 23 and 24, 1977 are arranged for NRC technical staff members. The purpose of the visits is to facilitate the completion of our Watts Bar safety review Q1s. A tour of Sequoyah is also included as a means for further enhancing our understanding of the Watts Bar plant design features.

You may expect branch members from Reactor Systems, Accident Analysis, Radiological Assessment, and the Corps of Engineers as well as the licensing project manager. The details of the visits will be provided to Mr. Byrd.

Thank you for your cooperation.

Sincerely,

Steven A. Varga, Chief
Light Water Reactors Branch 4
Division of Project Management
