DEC 2 3 1976

Docket Nos: 50-390

and 50-391

Tennessee Valley Authority
ATIN: Mr. Godwin Williams, Jr.
Manager of Power
830 Power Building
Chattanooga, Tennessee 37401

Gentlemen:

FIRE PROTECTION EVALUATION - WATTS BAR NUCLEAR PLANT 1 AND 2

By letter dated September 30, 1976, we requested that you submit proposed Technical Specifications on fire protection for Watts Bar Nuclear Plant 1 and 2. The enclosed sample Technical Specifications are intended to provide guidance in the scope and types of such specifications. The enclosure uses the Standard Technical Specification format and may require some adaptation to conform with the format of your Technical Specifications. Blanks or parentheses appear where the information is plant specific. These sample Technical Specifications are not intended to alter the NRC positions given in Appendix A to Branch Technical Position 9.5-1 which has been previously sent to you. The essential part of this guidance is to indicate the scope of material to be included in the Technical Specifications for your facility in the areas of equipment and administrative requirements, and the actions that we would find appropriate if a limiting condition for operation could not be met.

We are also enclosing an Errata Sheet for Appendix A to Branch Technical Position APCSB 9.5-1, "Guidance for Fire Protection for Nuclear Power Plants."

Sincerely, Original signed by?

S. A. Varga, Chief Light Water Reactors Branch No. 4 Division of Project Management

Enclosure:

- 1. Sample Technical Specifications dated November 3, 1976
- 2. Errata Sheet
