REGULATORY DOCKET FILE COPY

May 19, 1978

Mr. Edson G. Case, Acting Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Case:

In the Matter of the Application of) Docket Nos. 50-390
Tennessee Valley Authority) 50-391

Submitted herewith are 41 copies of the following information which responds to questions 2.11 and 3.2 of "Supplement No. 1 Responses to NRC Questions for Operating License Stage Environmental Review - Watts Bar Nuclear Plant."

1. Watts Bar - Volunteer 500-kV Transmission Line - Final historical and archaeological coordination from the Tennessee Historical Commission.
2. Fish success analysis for the Watts Bar Dam tailwater.

As was stated in TVA's supplement No. 1 responses to these two questions, this information was to be submitted at a later date when available.

Very truly yours,

J. E. Gilleland
Assistant Manager of Power

Re: Archaeological Survey of Watts Bar - Volunteer 500 kV
transmission line corridor

Dear Mr. Msarsa:

The State Historic Preservation Officer and his professional staff have reviewed the archaeological consultant report of findings entitled Watts Bar-Volunteer Transmission Line Archaeological Survey by Danny E. Olinger and Archaeological Survey of Part of Corridor for Watts Bar - Volunteer 500 kV Tie Line by James H. Polhemus, and we concur with TVA's determination that no archaeological remains eligible for inclusion in the National Register will be affected. This conclusion is based on information provided by TVA and their stated commitment to avoid the recorded loci of historic and prehistoric activity (letter from M. Msarsa to H. Harper, June 14, 1977).

I would like to stress the importance of TVA's archaeological consultants to record site survey information with the state Division of Archeology so that any sites located through TVA's efforts can be included in the state's inventory of archaeological sites. Future reports submitted to this office should contain state archaeological site numbers rather than provisional numbers whenever possible. Thank you for your cooperation in this matter.

Yours for a better tomorrow,

Herbert L. Harper

Re: Watts Bar-Volunteer 500 kV T.L. (A-6000.1)

Dear Mr. Roark:

This office has reviewed the above project plans and associated information on historic and architectural resources provided by your office. Based on this data, it is our opinion that the undertaking will not affect any historical or architectural properties included in or eligible for inclusion in the National Register of Historic Places.

Thank you for consulting with this office.

Yours for a better tomorrow,
