Mr. Leonard Murphy
U. S. Department of Commerce
National Oceanic and Atmospheric
Administration
National Ocean Survey
Washington Science Center
Rockville, Maryland 20852

Dear Mr. Murphy:

In accordance with the understandings which were reflected in Chairman Seaborg's letter of October 3, 1963, to Admiral Karo, I am forwarding Volumes 1, 2, 3, and 4 of the Preliminary Safety Analysis Report filed by the Tennessee Valley Authority for its proposed two pressurized water nuclear power reactors. The proposed reactors, designated as the Watts Bar Nuclear Plant Units 1 and 2, are to be located on the Agency's site in Rhea County, Tennessee.

We would appreciate receiving a report from the National Ocean Survey concerning seismological characteristics of the proposed reactor location which may have a bearing upon our safety evaluation of the proposed site. Reimbursement for services rendered in this connection should be charged to Order No. WA-5593-71.

Sincerely,

Original Signed By
R. C. DeYoung

Richard C. DeYoung, Assistant Director
for Pressurized Water Reactors
Division of Reactor Licensing
