

OCT 15 1971

Docket Nos. 50-390 ✓
and 50-391

Judge Malcolm Choldstone
Chief Executive Officer of Rhea County
Rhea County Courthouse
Dayton, Tennessee 35321

Dear Judge Choldstone:

In an effort to be more responsive to the needs of the public the Atomic Energy Commission has established locations where members of the public can inspect documents relating to applications currently under review by the regulatory staff for construction permits and facility licenses. These locations are near the site of the proposed nuclear plant and, for the most part, are in public libraries, thereby providing easy access to the public.

The Commission currently has pending an application for the Watts Bar Nuclear Plant, Units 1 and 2. The address of the local public document room for this project is:

Mrs. Vivian Coxey
Dayton Public Library
First Avenue
Dayton, Tennessee 37321

You may wish to refer members of the public who contact your office to this location where they can review the application and other related documents.

Sincerely,

DISTRIBUTION:
