U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, D.C. 20555

Gentlemen:

In the Matter of the Application of) Docket Nos. 50-390
Tennessee Valley Authority) 50-391

WATTS BAR NUCLEAR PLANT (WBN) UNITS 1 AND 2 - FINAL SAFETY ANALYSIS
REPORT (FSAR) AMENDMENT 89 - ADDENDUM

This letter provides ten copies of effective pages to FSAR Amendment 89 submitted on May 16, 1995. Table 11.5-1, which was inadvertently omitted during the administrative copying process of the amendment, was previously submitted in draft to the NRC by a letter dated February 17, 1995, that responded to a request for additional information concerning Amendment 77, Chapter 11. TVA committed in that letter to amend the FSAR with the draft changes by Amendment 89.

The enclosure provides pages that need to be replaced to correct the amendment for the insertion of the subject table. Please replace page 21/22 of the "Instruction Sheet for Page Replacement," replace page 71 of the "Effective Page Listing," and insert Table 11.5-1 as instructed.

If you should have any questions concerning this matter, please telephone John Vorees at (615) 365-8819.

Sincerely,

Paul R. Baron
Nuclear Assurance
and Licensing Manager (Acting)
