APPLICANT: Tennessee Valley Authority (TVA)

FACILITY: Watts Bar, Bellefonte, Sequoyah

SUBJECT: SUMMARY OF MEETING WITH TVA ON SEISMIC BASIS FOR THREE PLANTS

On April 5, 1978 members of the staff and management met with representatives from TVA to discuss their efforts on the adequacy of the seismic design for the three nuclear plants. This meeting was essentially a continuation of the discussions that had transpired on March 1, 1978 and reported in a Summary Report of March 28, 1978 by the NRC licensing project manager for Watts Bar. One additional factor that was made known to the applicant was the establishment of an NRC Staff Working Group. The charter for the group is to (1) evaluate the problem, (2) consider various methods of resolution and (3) recommend a path of resolution. The work of this group would report its findings to NRC management in approximately 30 days.

We reiterated our concerns that had been expressed in the previous meeting on this subject and the need for a timely resolution. The applicant assured the staff that they understood our concerns. TVA reaffirmed that the information and analysis to confirm the adequacy of the seismic designs would be developed and submitted in two phases and two reports, taking into consideration the suggestions that had been provided. Further suggestions by the NRC Working Group for the resolution of this problem would be welcomed by TVA.
