Gentlemen:

In the Matter of the Application of) Docket Nos. 50-390
Tennessee Valley Authority)

WATTS BAR NUCLEAR PLANT (WBN) UNIT 1 - GENERIC LETTER (GL) 88-20,
SUPPLEMENT 4 - INDIVIDUAL PLANT EXAMINATION OF EXTERNAL EVENTS (IPEEE) FOR
SEVERE ACCIDENT VULNERABILITIES - EXTENSION REQUEST (TAC NO. M74488)

This letter requests an extension to TVA's commitment to provide the results
of the WBN IPEEE by June 1994.

In TVA's letter dated December 20, 1991, concerning the subject GL supplement
response, TVA committed to provide the results of the IPEEE for WBN Unit 1
and Common by June 1994. TVA requests an extension for that commitment until
May 1995 because of the current fuel load and startup schedule. Available
resources are being devoted to support these milestones, thus making it
necessary to request an extension to the commitment date to provide the IPEEE
results. This scheduled extension was discussed with NRC Project Manager for
WBN, Peter Tam, on October 6, 1992.

If you have any questions concerning this matter, please telephone
John Vorees at (615) 365-8819.

Very truly yours,

William J. Museler
