Gentlemen:

In the Matter of the Application of )
Tennessee Valley Authority )

Docket Nos. 50-390

WATTS BAR NUCLEAR PLANT (WBN) - REVISED INSERVICE TESTING PROGRAM

The purpose of this submittal is to provide a revision to the WBN American Society of Mechanical Engineers (ASME) Section XI Pump and Valve Inservice Testing (IST) Program including relief requests.

TVA submitted by letter of March 27, 1985, the original ASME Section XI Pump and Valve Test (P&VT) Program. This submittal was subsequently amended by letters of April 12, 1985; April 29, 1985; October 3, 1985; and May 1, 1986. In accordance with 10 CFR 50.55a(g)(4)(i) this program is required to comply with the latest edition and addenda of the ASME code on the date 12 months prior to the subsequent issuance of the operating license.

WBN unit 1 is projected to receive an operating license later this year. Consequently the required "Code of Record" for the P&VT Program is the 1989 Edition of ASME Section XI which in turn invokes ANSI/ASME Operations and Maintenance (OM) Standard, OMa-1988 Addenda to the OM-1987 Edition, Part 6 for IST of pumps and Part 10 for IST of valves. The attached enclosure reflects a complete rewrite based on these later requirements.

If you should have any questions, contact P. L. Pace at (615) 365-1824.

Very truly yours,

William J. Museler
