Gentlemen:

In the Matter of the Application of) Docket Nos. 50-390
Tennessee Valley Authority) 50-391

WATTS BAR NUCLEAR PLANT (WBN) UNIT 1 AND 2 - NOTIFICATION OF INTENT
TO IMPLEMENT THE RADIOLOGICAL RESPIRATORY PROTECTION PROGRAM -
10 CFR 20.1703(d)

In accordance with the requirements of 10 CFR 20.1703(d), "Use of Individual Respiratory Protection Equipment," TVA is providing notification of intent to implement the Radiological Respiratory Protection Program at WBN on or about July 14, 1995. TVA does not anticipate actual airborne radioactivity conditions by that date. However, Hot Functional Testing 2, scheduled to begin in mid-July, will be conducted under a simulated operating configuration that includes an active radiological respiratory protection program. These simulated activities provide the opportunity to practice, gain experience in, and troubleshoot the various aspects of the program.

WBN procedures are in place that establish the respiratory protection policies and requirements, and those procedures will be implemented concurrent with the implementation of this program. Procedures and equipment are current with the existing regulatory requirements. Additionally, WBN personnel have been trained to support this program.
