SUBJECT: FEMA FINAL REPORT FOR THE OCTOBER 6-7, 1993, JOINT EXERCISE OF
OFFSITE RADIOLOGICAL EMERGENCY RESPONSE PLANS FOR THE WATTS BAR
NUCLEAR STATION

Gentlemen:

Enclosed is the final report dated May 22, 1995, from the Federal Emergency Management Agency (FEMA) discussing their findings of the joint exercise of offsite radiological emergency response plans for the Watts Bar Nuclear Station conducted on October 6-7, 1993.

One Deficiency was identified involving the inability of the State of Tennessee failing to demonstrate the capability to provide both an alert signal and an initial instructional message to the populated areas throughout the 10-mile plume EPZ within 15 minutes of the decision to activate the alert and notification system to implement a protective action decision. This Deficiency was corrected during a remedial exercise conducted on November 15, 1993. Also identified were three Areas Requiring Corrective Actions (ARCAs). A detailed description of the ARCAs is included in the enclosed FEMA exercise report.

We encourage you to work closely with the State in resolving this deficiency. If you have any questions, please contact K. P. Barr at 404-331-0335.

Sincerely,

Original Signed by:

Johns P. Jaudon, Deputy Director
TVA Construction
Division of Reactor Projects
