

Examples of Max Thermal Power License Conditions

Arkansas Unit 1/2 - EOI is authorized to operate the facility at steady state reactor core power levels not in excess of XXXX megawatts thermal.

Beaver Valley Unit 1/2 - FENOC is authorized to operate the facility at a steady state reactor core power level of XXXX megawatts thermal.

Braidwood Unit 1/2 - The licensee is authorized to operate the facility at reactor core power levels is not in excess of XXXX.X megawatts thermal (100 percent rated power)

Browns Ferry Unit 1/2/3 - The licensee is authorized to operate the facility at steady state reactor core power levels not in excess of XXXX megawatts thermal.

Brunswick Unit 1/2 - The licensee is authorized to operate the facility at steady state reactor core power levels not in excess of 2923 megawatts thermal.

Byron Unit 1/2 - The licensee is authorized to operate the facility at reactor core power levels not in excess of XXXX.X megawatts thermal (100 percent power).

Callaway Unit 1 - UE is authorized to operate the facility at reactor core power levels not in excess of 3565 megawatts thermal (100% power).

Calvert Cliffs Unit 1/2 - The licensee is authorized to operate the facility at steady-state reactor core power levels not in excess of XXXX megawatts-thermal.

Catawba Unit 1/2 - Duke Power Company LLC is authorized to operate the facility at reactor core full steady state power level of XXXX megawatts thermal (100%).

Clinton Unit 1 - AmerGen Energy Company, LLC is authorized to operate the facility at reactor core power levels not in excess of 3473 megawatts thermal (100 percent rated power).

Columbia - The licensee is authorized to operate the facility at reactor core power levels not in excess of full power (3486 megawatts thermal).

Comanche Peak Unit 1/2 - Luminant Generation Company LLC is authorized to operate the facility at reactor core power levels not in excess of 3458 megawatts thermal.

Cooper - The licensee is authorized to operate the facility at steady state reactor core power levels not in excess of 2381 megawatts (thermal).

Crystal River Unit 3 – Florida Power Corporation is authorized to operate the facility at a steady state reactor core power level not in excess of 2568 Megawatts (100 percent of rated core power level).

Davis Besse Unit 1 - FENOC is authorized to operated the facility at steady state reactor core power levels not in excess of 2772 megawatts (thermal).

Diablo Canyon Unit 1/2 - The Pacific Gas and Electric Company is authorized to operate the facility at reactor core power levels not in excess of XXXX megawatts thermal (100% rated power)

DC Cook Unit 1/2 - The licensee is authorized to operate the facility at steady state reactor core power levels not to exceed XXXX megawatts thermal.

Dresden Unit 2/3 - The licensee is authorized to operate the facility at steady state reactor core power levels not in excess of XXXX megawatts thermal (100 percent rated power).

Duane Arnold - FPL Energy Duane Arnold, LLC is authorized to operate the Duane Arnold Energy Center at steady state reactor core power levels not in excess of 1912 megawatts (thermal).

E.I.Hatch Unit 1 - Southern Nuclear is authorized to operate the facility at steady state reactor core power levels not In excess of XXXX megawatts thermal.

Fermi Unit 2 - DECo is authorized to operate the facility at reactor core power levels not in excess of 3430 megawatts thermal (100% power).

Fort Calhoun - Omaha Public Power District is authorized to operate the Fort Calhoun Station, Unit 1, at steady state reactor core power levels not in excess of 1500 megawatts thermal (rate power).

Grand Gulf Unit 1 - Entergy Operations, Inc. is authorized to operate the facility at reactor core power levels not in excess of 3898 megawatts thermal (100 percent power).

H.B. Robinson Unit 2 - The licensee is authorized to operate the facility at a steady state reactor core power level not in excess of 2339 megawatts thermal.

Hope Creek - PSEG Nuclear LLC is authorized to operate the facility at reactor core power levels not in excess of 3339 megawatts thermal (100 percent rated power).

Indian Point Unit 2/3 - ENO is authorized to operate the facility at steady state reactor core power levels not in excess of XXXX megawatts thermal.

J.A. Fitzpatrick - ENO is authorized to operate the facility at steady state reactor core power levels not in excess of 2536 megawatts (thermal).

J.M. Farley Unit 1 - Southern Nuclear is authorized to operate the facility at steady state reactor core power levels not in excess of 2775 megawatts (thermal).

J.M. Farley Unit 2 - Southern Nuclear is authorized to operate the facility at reactor core power levels not in excess of 2775 megawatts thermal.

Kewaunee - The licensee is authorized to operate the facility at steady-state reactor core power levels not in excess of 1772 megawatts (thermal).

LaSalle Unit 1/2 - The licensee is authorized to operate the facility at reactor core power levels not in excess of full power (3489 megawatts thermal).

Limerick Unit 1/2 - Exelon Generation Company is authorized to operate the facility at reactor core power levels not in excess of XXXX megawatts thermal (100% rated power).

McGuire Unit 1/2 - The licensee is authorized to operate the facility at a reactor core full steady state power level of XXXX megawatts thermal (**100%**).

Millstone Unit 2 - The licensee is authorized to operate the facility at steady-state reactor core power levels not in excess of 2700 megawatts thermal.

Millstone Unit 3 - DNC is authorized to operate the facility at reactor core power levels not in excess of 3411 megawatts thermal (100 percent rated power).

Monticello Unit 1 - NMC is authorized to operate the facility at steady state reactor core power levels not in excess of 1775 megawatts (thermal).

Nine Mile Point Unit 1 - The licensee is authorized to operate the facility at steady state reactor core power levels not in excess of 1850 megawatts (thermal).

Nine Mile Point Unit 2 - Nine Mile Point Nuclear Station, LLC, is authorized to operate the facility at reactor core power levels not in excess of 3467 megawatts thermal (100 percent rated power)

North Anna Unit 1 - VEPCO is authorized to operate the North Anna Power Station, Unit No. 1, at reactor core power levels not in excess of 2893 megawatts (thermal).

North Anna Unit 2 - VEPCO is authorized to operate the facility at steady state reactor core power levels not in excess of 2893 megawatts (thermal).

Oconee Unit 1/2/3 - The licensee is authorized to operate the facility at steady state reactor core power levels not in excess of XXXX megawatts thermal.

Oyster Creek - AmerGen Energy Company, LLC is authorized to operate the facility at steady-state power levels not in excess of 1930 megawatts (thermal) (100 percent rated power).

Palisades - ENO is authorized to operate the facility at steady-state reactor core power levels not in excess of 2565.4 Megawatts thermal (100 percent rated power).

Palo Verde Unit 1/2/3 - Arizona Public Senrice Company (APS) is authorized to operate the facility at reactor core power levels not In excess of XXXX megawatts thermal (100% power).

Peach Bottom Unit 2/3 - Exelon Generation Company is authorized to operate the Peach Bottom Atomic Power Station, Unit 2, at steady state reactor core power levels not in excess of XXXX megawatts thermal.

Perry Unit 1 - FENOC is authorized to operate the facility at reactor core power levels not in excess of 3758 megawatts thermal (100% power).

Pilgrim - END is authorized to operate the facility at steady state power levels not to exceed 2028 megawatts thermal.

Point Beach Unit 1/2 - FPLE Point Beach is authorized to operate the facility at reactor core power levels not in excess of XXXX megawatts thermal.

Prairie Island Unit 1/2 - NMC is authorized to operate the facility at steady state reactor core power levels not in excess of 1650 megawatts thermal.

Quad Cities Unit 1/2 - EGC is authorized to operate Quad Cities Unit No. 1 at power levels not in excess of XXXX megawatts (thermal).

R.E. Ginna - Ginna LLC is authorized to operate the facility at steady-state power levels up to a maximum of 1775 megawatts (thermal).

River Bend Unit 1 - EOI is authorized to operate the facility at reactor core power levels not in excess of 3091 megawatts thermal (100% rated power).

Salem Unit 1/2 - PSEG Nuclear LLC is authorized to operate the facility at a steady state reactor core power level not in excess of XXXX megawatts (one hundred percent of rated core power).

San Onofre Unit 2/3 - Southern California Edison Company (SCE) is authorized to operate the facility at reactor core power levels not in excess of full power (XXXX megawatts thermal).

Seabrook Unit 1 - FPL Energy Seabrook, LLC, is authorized to operate the facility at reactor core power levels not in excess of 3648 megawatts thermal (100% of rated power).

Sequoyah Unit 1/2 - The Tennessee Valley Authority is authorized to operate the facility at reactor core power levels not in excess of 3455 megawatts thermal.

Shearon Harris Unit 1 - Carolina Power & Light Company is authorized to operate the facility at reactor core power levels not in excess of 2900 megawatts thermal (100 percent rated core power).

South Texas Project Unit 1/2- STPNOC is authorized to operate the facility at reactor core power levels not in excess of 3,853 megawatts thermal (100% power).

St. Lucie Unit 1/2 - FPL is authorized to operate the facility at steady state reactor core power levels not in excess of 2700 megawatts (thermal).

Surry Unit 1/2 – The licensee is authorized to operate the facility at steady state reactor core power levels not in excess of XXXX megawatts (thermal).

Susquehanna Unit 1 - PPL Susquehanna, LLC is authorized to operate the facility at reactor core power levels not in excess of 3489 megawatts thermal.

Susquehanna Unit 2 - PPL Susquehanna, LLC is authorized to operate the facility at reactor core power levels not in excess of 3489 megawatts thermal (100% power).

Three Mile Island Unit 1 - AmerGen Energy Company, LLC is authorized to operate the facility at steady state reactor core power levels not in excess of 2568 megawatts thermal.

Turkey Point Unit 3/4 - The applicant is authorized to operate the facility at reactor core power levels not in excess of XXXX megawatts (thermal).

Vermont Yankee - Entergy Nuclear Operations, Inc. is authorized to operate the facility at reactor core power levels not to exceed 1912 megawatts thermal.

V.C. Summer Unit 1 - SCE&G is authorized to operate the facility at reactor core power levels not in excess of 2900 megawatts thermal.

Vogtle Unit 1/2 - Southern Nuclear is authorized to operate the facility at reactor core power levels not in excess of XXXX megawatts thermal (100 percent power)

Waterford Unit 3 - EOI is authorized to operate the facility at reactor core power levels not in excess of 3716 megawatts thermal (100% power).

Watts Bar Unit 1 - TVA is authorized to operate the facility at reactor core power levels not in excess of 3459 megawatts thermal

Wolf Creek Unit 1 - The Operating Corporation is authorized to operate the facility at reactor core power levels not in excess of 3565 megawatts thermal (100% power).
