National Archives & Record Administration
Washington, DC 20408

SUBJECT: EXPEDITED PUBLICATION OF INDIVIDUAL NOTICE REGARDING LOWER
INLET DOOR MONITORING SYSTEM

Dear Mr. Mosley:

This is a request to expedite publication of the Individual Notice for the Watts Bar containment lower inlet door monitoring system for the Nuclear Regulatory Commission.

This Individual Notice needs to be published as soon as practical since the Watts Bar Nuclear Plant is currently operating with a lower containment inlet door monitoring system which is providing sporadic alarms, which at any time, could result in requirements which could require shutdown of the unit. The subject amendment of this Notice would provide temporary relief until the unit shuts down in February 1999 and repairs the circuitry for the system.

Thank you for your cooperation in this matter.

Sincerely,

/s/

Frederick J. Hebdon, Director
Project Directorate II-1
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
