

November 28, 2007

Mr. E. Kurt Hackmann
Decommissioning Director
Westinghouse Electric Company LLC
3300 State Road P
Festus, MO 63028

SUBJECT: WESTINGHOUSE ELECTRIC COMPANY, LLC - HEMATITE FACILITY
FISCAL YEAR (FY) 2008 MASTER INSPECTION PLAN

Dear Mr. Hackmann:

In accordance with NRC Manual Chapter 2602, "Decommissioning Oversight and Inspection Program for Fuel Cycle Facilities and Materials Licensees," NRC Region III staff and management have developed a Master Inspection Plan (MIP) for the Hematite facility. The plan is projected based on your proposed schedule of decommissioning activities for the site from November 2007 through September 2008 (FY2008). The plan outlines how we intend to focus our Regional inspection resources to address significant ongoing decommissioning activities.

Because the FY2008 MIP is based on your proposed schedule of significant decommissioning activities, the plan and the focus of NRC inspection activities may change to reflect a change in your planned decommissioning activities or your performance. In order to ensure that the MIP remains current, we request that you keep the Decommissioning Branch staff informed of any significant changes in your proposed schedule of decommissioning activities. You will be informed of any significant changes to the Hematite FY2008 MIP.

We project that the Region will conduct two to three inspections during FY2008. These inspections will involve performance based observations of decontamination and final status survey activities, as well as some NRC confirmatory surveys. The inspection procedures, which we may use during our inspections, are listed below. The use of specific procedures will depend on the decommissioning activities being conducted. The inspection procedures listed below are accessible from the NRC website at <http://www.nrc.gov/reading-rm/doc-collections/insp-manual/inspection-procedure/index.html>.

<u>Inspection Procedure</u>	<u>Title</u>
IP 88005	Management Organization and Controls
IP 83822	Radiation Protection
IP 93001	OSHA Interface Activities
IP 86740	Inspection of Transportation Activities
IP 88035	Radioactive Waste Management
IP 88045	Environmental Protection
IP 83890	Closeout Inspection and Survey

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

We will gladly discuss any questions you may have regarding this MIP. If you have questions, please contact Mr. Mike McCann of my staff. He can be reached at (630) 829-9856.

Sincerely,

/RA/

Patrick L. Loudon, Chief
Decommissioning Branch
