REGULATORY DOCKET FILE COPY

Ms. Ellen G. Aronson
U.S. Nuclear Regulatory Commission
Mail Stop L-237
Washington, D.C. 20555

Dear Ms. Aronson:

Mr. Jack Strickland requested that I assist you in obtaining information on Meigs, McMinn and Rhea Counties. As such, I have pulled together all the long range plans and Regulatory Controls that have been developed for the above-mentioned areas. The list attached indicates the studies that have been sent under separate cover and the list also indicates with an asterisk those studies that have been published but are currently out of print. We have file copies of these out of print studies and could make a Xerox copy of a particular study if it were necessary. I have also included a copy of the Regional Land Use Plan which was prepared by our agency under contract for the Southeast Development District.

I feel sure it will take a while to digest the 25 pounds of studies we have sent, but once you have, please feel free to call or write if I can be of any further assistance to you on this project.

Good luck and good reading.

Sincerely,

John R. Moeller
