Subject: Application for Exempt Distribution of Irradiated Gemstones License

Dear Mr. Carrico,

International Isotopes Inc. is submitting an application for a license to authorize the distribution of irradiated gemstones to unlicensed individuals. There is notable concern in the gemstone industry that the availability of neutron irradiated gemstones, primarily blue topaz in the United States may be greatly reduced or all together eliminated, resulting in substantial financial losses for wholesalers and retailers of blue topaz jewelry. It is requested that this request be acted upon expeditiously so that the growing concern over the supply of neutron irradiated blue topaz in the gemstone industry can be stemmed and the financial losses kept to a minimum.

A completed NRC Form 313 and supporting documentation is enclosed for your review, as is check for \$8700.00 to cover the cost of the licensing application fee. I would also request that the contents of this application be considered proprietary.

Should you have any questions, please contact me by phone at (208) 524-5300 or by email at jjmiller@intisoid.com.

Sincerely,

John J. Miller, CHP
