

January 6, 1993

Docket No. 50-390

APPLICANT Tennessee Valley Authority (TVA)
 FACILITY: Watts Bar Nuclear Plant, Unit 1
 SUBJECT: MEETING SUMMARY - DECEMBER 9, 1992, DISCUSSION ON THE TECHNICAL REQUIREMENTS MANUAL (TAC M76742)
 REFERENCE: Meeting notice by P. S. Tam, November 24, 1992

On December 9, 1992, NRC and TVA representatives met in the TVA office in Rockville, Maryland to discuss issues raised as a result of the staff's review of the draft Technical Requirements Manual (TRM). This is part of NRC and TVA's efforts on development of the Watts Bar Unit 1 Technical Specifications (TS); the draft TRM contains relocated requirements normally contained in the TSs of other nuclear plants. Enclosure 1 is the list of meeting participants.

There was no written agenda for the meeting since it was a working meeting in which the participants went over comments on the TRM from cover to cover, resolving them or agreeing to perform more work to resolve them. The staff stated that the draft TRM appears to be in good shape. Most of the comments exchanged between the staff and TVA pertain to editorial improvement and style.

The next TS meeting is tentatively scheduled for the second week of January 1993.

Original signed by

Peter S. Tam, Senior Project Manager
 Project Directorate II-4
 Division of Reactor Projects - I/II
 Office of Nuclear Reactor Regulation
