

Docket Nos. 50-390
and 50-391

June 21, 1994

APPLICANT: Tennessee Valley Authority (TVA)

FACILITY: Watts Bar Nuclear Plant, Units 1 and 2

SUBJECT: MEETING SUMMARY - JUNE 20, 1994, ROUTINE CONFERENCE ON
LICENSING STATUS (TAC M72494 AND M72495)

REFERENCE: Meeting notice by P. S. Tam, June 9, 1994

On June 20, 1994, NRC and TVA representatives met telephonically to discuss the status, needed actions, priorities and schedules of various licensing issues. These include all unresolved outstanding issues, confirmatory issues, proposed license conditions, corrective action programs (CAPs), special programs (SPs), and TVA's response to generic letters and bulletins. The discussion was based on the latest licensing status as published in the Watts Bar Safety Evaluation Report Supplement 13 (NUREG-0847, Supp. 13). The Office of Nuclear Reactor Regulation (NRR) issues the Safety Evaluation Report (NUREG-0847) and supplements (SSERs) as its principal licensing basis documents for Watts Bar. Section 1 of the latest SSER (SSER 13) officially documents the issues that NRR considers needing resolution before an operating license can be granted.

Schedular information regarding NRR reviews and other comments were exchanged with TVA personnel, agreed upon, and subsequently used to update the NRR staff's work control system, Workload Information and Scheduling Program (WISP). The output of WISP (Enclosure 2) records the staff's understanding of the status of each active NRR action.
