**Subject:** update

We were informed the meeting with TVA and the NRC has been pushed back a couple of weeks due to the poor performance of an oil pump at Watts Bar Unit 1 in Spring City, TN. We would like to get an updated timetable and were hopeful that you could provide us with that information.

Sincerely,

Michelle Neal  
Organizer  
Tennessee Valley Energy Reform Coalition

**Subject:** update -Reply

The Commission meeting, originally scheduled for 1/5/96, was rescheduled for 1/31/96 at 2:00 pm. The only reason is the slippage of the projected date for initial criticality, which has slipped from 12/27/95 to 1/16/96. (The difficulty with the reactor coolant pump oil lifting pump was part of the cause for the slippage.) The Commission will not meet until initial criticality has been attained.

Peter Tam
