Ivan Selin, Chairmain
Nuclear Regulatory Commission
One White Flint North
11155 Rockville Pike
Rockville, MD

Dear Chairman Selin,

I am a producer for the Fox television network's new primetime news magazine show. The show will air nationally, once a week, beginning next month.

I am presently working on a story about the safety and security of the nuclear power plants regulated by the NRC. I found your comments at the hearings of Senators Leiberman and Glenn extremely interesting. I would very much like to do an on-camera interview you regarding the issues of safety and security at those nuclear plants.

I am fairly flexible, but will need to shoot the interview, lasting approximately one hour, sometime between May 27th and June 8th. I sincerely hope that you grant this request since it would be impossible to get the information I seek from a source with more authority or expertise.

Thank you for your kind attention.

Sincerely,

Daniel S. Goldfarb
Producer
Fox News

P.S. I will follow up this correspondence with a call to your office on 5/19. I can be reached at [310] 284-3651. thankyou again.

* Helpful hints from
17th floor.

Prepare memo to Chairman for J. Taylor signature that will address, as a minimum, the following:

1. Describe, in general terms, the security program requirements for construction sites. What security measures are in place at Watts Bar? What special controls are required for new fuel storage, and are these controls in place at Watts Bar?
2. Are there any limitations on what can be filmed at a construction site? Are there any controls on packages entering the site?
3. Are there any safety concerns regarding fuel storage onsite? What would be the consequences of sabotage?
4. Based on the alleged entry onto the site and filming by FOX TV, do we have any concerns about security at Watts Bar? If so, what follow-up action is necessary?

SV - We will take for action.
Pls prepare memo - in reply for
Security. W 6/17
