

June 7, 1995

Mr. Gerry L. Jones
Idaho National Engineering Laboratory
P. O. Box 1625
MS-H-3870
Idaho Falls, Idaho 83415

Dear Mr. Jones:

SUBJECT: TRANSMITTAL OF DOCUMENTS FOR THE WATTS BAR UNIT 1 TECHNICAL SPECIFICATIONS AUDIT (Fin J-2037)

In accordance with the requirements under Job Code J-2037, you will find the following:

1. 2 diskettes containing the Watts Bar Safety Evaluation Report (SER) NUREG-0847, dated June 1982.
2. Copy of Watts Bar Final Draft TS.
3. Copy of Bases for Watts Bar Final Draft TS.
4. Copy of Technical Requirements Manual.
5. Updated Road Map of Technical Specifications (TS) locations (1985 Final Draft TS to 1995 improved Final Draft TS) date April 21, 1995.

The Updated Road Map is provided to show in which license controlled document the various SER TS requirements have been placed. Because of numerous changes in the Standard TS and in the Watts Bar design since 1985, a copy of the 1985 Watts Bar Final Draft TS is not necessary for this audit. With this package, you should have sufficient documentation to begin the audit of the Watts Bar TS in accordance with Job Order J-2037. The TAC number is M76742.

If you have any questions or need additional documentation, please call me on (301)415-3152.

Sincerely,

Robert J. Giardina
Reactor Engineer
Technical Specifications Branch
