

October 19, 1995

Mr. Oliver D. Kingsley, Jr.
President, TVA Nuclear and
Chief Nuclear Officer
Tennessee Valley Authority
6A Lookout Place
1101 Market Street
Chattanooga, Tennessee 37402-2801

SUBJECT: WATTS BAR UNIT 1 - TECHNICAL EVALUATION REPORT ON THE TECHNICAL
SPECIFICATIONS AUDIT (TAC M76742)

Dear Mr. Kingsley:

*See
Reports*

During June through August 1995, the staff performed an audit of the final draft Technical Specifications (TS) with assistance from its contractor, Idaho National Engineering Laboratory (INEL). The audit achieved its intended purpose and verified that the TS reflects the facility as described in the Watts Bar Final Safety Analysis Report (FSAR), docketed correspondence, and the staff's Safety Evaluation Report (NUREG-0847) and supplements.

Details of the audit findings are documented in the enclosed INEL Technical Evaluation Report (TER) INEL 95/0468, dated September 1995. The staff concurs with the findings and adopts the conclusions of the TER. Please note that issues brought up by the report have already been addressed in the TS review process. The sole purpose of this letter is to transmit a copy of the report to you.

Sincerely,
Original signed by

Peter S. Tam, Senior Project Manager
Project Directorate II-3
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
