AUGUST 20, 2007

The U.S. Nuclear Regulatory Commission (NRC or the staff) and representatives of Entergy Nuclear Operations, Inc. held a telephone conference call on August 20, 2007, to discuss the regulatory requirements stated in 10 CFR 54.21(c)(1) as it relates to the Vermont Yankee Nuclear Power Station (VYNPS) license renewal application (LRA).

Discussion summary: It is the NRC position that in order to meet the requirements of 10 CFR 54.21(c)(1), an applicant for license renewal must demonstrate in the LRA that the evaluation of the time-limited aging analyses (TLAA) has been completed. The NRC does not accept a commitment to complete the evaluation of the TLAA prior to entering the period of extended operation.

Based on the discussion, the applicant agreed to amend its LRA to demonstrate that the evaluation of the TLAA has been completed. The NRC's review of this TLAA evaluation will be documented in the final VYNPS safety evaluation report.
