Director of Nuclear Reactor Regulation
Attention: Mr. O.D.T. Lynch, Jr., Project Manager
Environmental Projects Branch 2
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

File Copy

Dear Mr. Lynch:

In the Matter of the Application of ) Docket Nos. 50-390
Tennessee Valley Authority ) 50-391

Enclosed for your review are two documents entitled "Baseline Adult Fish Monitoring Program" (Enclosure 1) and "Preoperational Aquatic Biota (Nonfish) Data" (Enclosure 2). This material was discussed during the Watts Bar Nuclear Plant environmental site visit of February 22, 1977.

The Baseline Adult Fish Monitoring Program is an 18-month study (during the period of about February 1977-September 1978) designed to obtain baseline information on the adult fish population in the vicinity of the Watts Bar Nuclear Plant. We anticipate that data from this program should be available for review by November 1978.

The Aquatic Biota (Nonfish) Data expands the material submitted in October 1976 in Section C of the Watts Bar Nuclear Plant Units 1 and 2 Environmental Information.

By copy of this letter we are also providing EPA, Region IV (Charles Kaplan, Atlanta, Georgia) with copies of the "Baseline Adult Fish Monitoring Program" and "Preoperational Aquatic Biota (Nonfish) Data."

Very truly yours,

J. E. Gilleland
Assistant Manager of Power
