Dr. Andrew Murphy
U.S. Nuclear Regulatory Commission

Dr. Murphy,

Enclosed are two CD's containing our results for Y6797, Evaluation of 2002 USGS National Seismic Hazard Assessment. The CD labeled NRC1 contains the hazard curves and deaggregations based on seismicity-rate grids with 0.1 degree spacing. The CD labeled NRC2 contains the results for 0.2 degree spacing. This CD also contains the RG1.165 type deaggregations and postscript files with plots of the hazard curves. See the readme files on both CD's for an explanation of filenames.

Sincerely,

Arthur Frankel

A-3
