Jay,

(1) Do you anticipate any RAIs for Davis-Besse Relief Request regarding 48-hour hold following J-groove nozzle weld repairs (TAC No. MD5956).

I see we've scheduled RAI input from tech staff to be complete by 8/13 (next week). Just a friendly reminder, as I recall you said you would be out of pocket later this month.

(2) I left in your mailbox the memo to file regarding the July 07 telecon with FENOC concerning the Exponent Report. I'd appreciate it if you could please review/comment and obtain DCI/CPNB concurrence at your earliest convenience.

Call me if you'd like to discuss any of this.

Thanks,

Tom
