Mr. A. Giambusso  
Deputy Director for Reactor Projects  
Directorate of Licensing  
Office of Regulation  
United States Atomic Energy Commission  
Washington, DC 20545

Dear Mr. Giambusso:

In the Matter of the Applications of ) Docket Nos. 50-327  
Tennessee Valley Authority ) 50-328  
50-390  
50-391

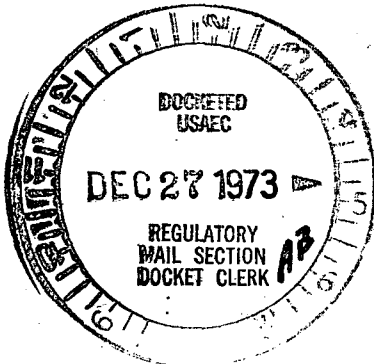

This is in response to your letter to James E. Watson dated October 10, 1973, concerning anticipated transients without scram (ATWS). We have reviewed AEC's technical report on ATWS, WASH-1270, and concur with the staff's position that units 1 and 2 of the Sequoyah Nuclear Plant and units 1 and 2 of the Watts Bar Nuclear Plant fall within the provisions of Section B of that report.

TVA is proceeding to evaluate the consequences of ATWS at the subject facilities in light of the criteria specified in WASH-1270 and by October 1, 1974, will submit analyses of ATWS consequences for regulatory staff review.

Very truly yours,

*J. E. Gilleland*

J. E. Gilleland  
Assistant to the Manager of Power
