Attention: Mr. Robert W. Kirkman, Director

FILE

Dear Mr. Kirkman:

We have noted with interest that the Martin Marietta Corporation has been issued Special Nuclear Materials License No. 1192 authorizing the decontamination of their facilities in Middle River, Maryland. On July 22, 1970 Mr. Thompson of our staff accompanied Mr. Schenault of the Martin Marietta Corporation on a tour of the facilities. From his observation of the work in process, it was apparent that satisfactory progress is being made.

In keeping with our goal to be knowledgeable in all facets of radioactive material utilization in Maryland, we would appreciate the opportunity to accompany the representative from your office when he performs the final survey. We know that the experience of the final survey will be very beneficial to us and thank you for notifying us when the final survey is firmly scheduled.

Sincerely yours,

Charles W. Keller
