Regulatory Docket File

Director of Nuclear Reactor Regulation
 Attention: Mr. Voss A. Moore, Assistant Director
 Environmental Projects
 U.S. Nuclear Regulatory Commission
 Washington, DC 20555

Dear Mr. Moore:

In the Matter of the Application of) Docket Nos. 50-390
 Tennessee Valley Authority) 50-391

In response to D. R. Muller's letter dated October 6, 1975, TVA is preparing a submittal to demonstrate the means we intend to employ for keeping the levels of radioactive materials in effluents from the Watts Bar Nuclear Plant in compliance with the Appendix I guidelines. TVA has elected to respond to the request by providing the information required by Enclosure 2 of the letter.

Because of problems encountered in gathering all the required information, we were unable to meet the March 31, 1976, date suggested in the letter. We now plan to submit the Enclosure 2 information for the Watts Bar plant by April 30, 1976. This has been discussed with your staff and we understand that this is an acceptable date.

Very truly yours,

A handwritten signature in cursive script, appearing to read 'J. E. Gilleland'.

J. E. Gilleland
 Assistant Manager of Power
