REGULATORY DOCKET FILE COPY

Mr. Edson G. Case
Acting Director of Licensing
Office of Regulation
U.S. Atomic Energy Commission
Washington, DC 20545

Dear Mr. Case:

In the Matter of the Application of) Docket Nos. 50-327
Tennessee Valley Authority) 50-328
50-390
50-391

Submitted herewith is revision 1 to report No. 72-22, "Evaluation of the Effects of Postulated Pipe Failures Outside of Containment for the Sequoyah Nuclear Plant Units 1 and 2." This revision completes the submittal of all systems evaluated for the consequences of postulated piping failures outside containment. As specified in our earlier submittal of May 14, 1974, this report is also applicable to the Watts Bar Nuclear Plant with any differences from the Sequoyah design to be addressed in the Watts Bar FSAR.

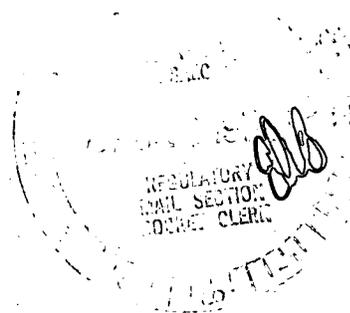

This revision simply replaces the total contents of your present binders for report No. 72-22.

Very truly yours,

A handwritten signature in cursive script, appearing to read "J. E. Gilleland".

J. E. Gilleland
Assistant to the Manager of Power
